EMSCO Installation Services

Protect your capital equipment investment with professional installation services.

You've just made a major decision on revamping your foundry. Now what? Changing or adding equipment to your foundry can be an exciting time for any operation. The last thing your operation needs is the pitfalls that can prolong any installation project. Let's face it; investing in new equipment for your operations is an expensive proposition. Why would you want to cut corners on its installation? Long-term profitability is dependent on getting it right from the beginning.

Do your employees have the expertise or, more importantly, the time to invest in your installation projects? These questions as well as their details are reasons why you need to deal with an experienced and qualified alternative.

EMSCO has served as a prime contractor for metal producing shops with installation budgets of \$15,000 to projects with multi-million dollar budgets.

No job is too small or too big for EMSCO's experienced staff of Project and Site Managers!

We're with you every step of the way!

Whether your project involves the removal or demolition of existing equipment or structures, engineering recommendations, scrap yard improvements, or the processing of your final product, EMSCO can handle any or all aspects of your project.

Our employees know how metal producing facilities operate and what is critical to your operation, production! That's why EMSCO organizes your installation project to have minimal impact on your ongoing production. EMSCO offers you the luxury of not worrying about installation and start-up details. Instead you are able to concentrate on making the new equipment profitable!

Because we work with you every step of the way, EMSCO's job quotes are complete and your price is guaranteed. Your project is completed on time and within budget, from specifications through start-up.

Contact EMSCO Installations.....your right choice to maximize the return on your equipment investment and to help you stay focused on what you do best, growing your business.

EMSCO is ready when you need us...every day.

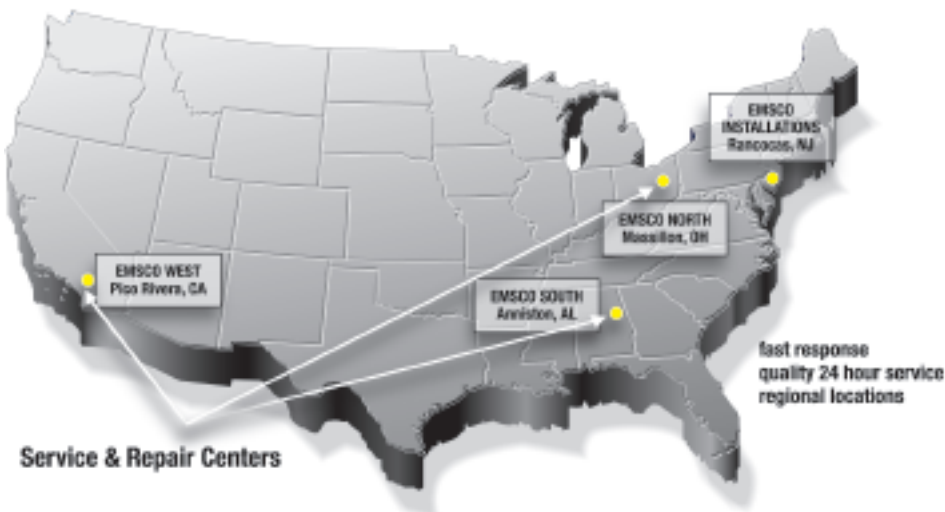

EMSCO's Commitment to you

KNOWLEDGE: EMSCO will begin each project with a customer-focused understanding of the problem to be solved and a soundly engineered approach to the solution.

COST: EMSCO will, when possible, offer more than one level of service and will explain the costs and compromises associated with each. Every option we propose will meet industry standards for safety.

QUALITY: EMSCO will understand and meet the quality expectations agreed to at the start of the project. Warranties will be explained and will set the standard for the industry.

OUR GOAL: EMSCO will provide quality services at reasonable prices so that our customers have the competitive edge in their markets.
