## Table Mount Furnace Repairs

### Table Mount Furnace Repairs and Rebuilds have more options available to users

The majority of metal melted and poured with induction furnaces comes from large batch melting induction systems. However, a significant contributor to overall metal poured capacity is the Table Mount Furnace. With capacities from 3 to 90 pounds, the Table Mount Furnace is a staple in the investment casting and precious metal industry.

While small by comparison, **EMSCO** pays special attention to these furnace users. The same type of standard stringent testing that has been incorporated on larger induction coils is used on hand furnace coils. Helium and flow testing are just two of the tests that are performed on all hand furnace coils.

As a world leader in the repair of induction furnaces, coils & water-cooled leads, **EMSCO** has experience in repairing and rebuilding all styles and designs of Table Mount Furnaces. With conveniently located regional repair centers, only **EMSCO** can offer you quality and on time rebuilds of your furnaces.

From the Two-Man Pour and Trunnion-Tilt Pour styles to the current Mini-Melt Table Furnace, **EMSCO** has the expertise to keep your furnaces in top condition for efficient operation.

# Parts Available When You Need Them!

As repair centers, only **EMSCO** maintains **over \$3,000,000** in strategically stocked inventory throughout our full-service regional repair centers. This means that spare parts and materials needed for your rebuilds are, at most, only a few hours away.

In addition to material, only **EMSCO** offers regional field service capabilities. Many foundries rely on **EMSCO** as their "maintenance partner" in helping keep them competitive in today's everchanging market.

Call **EMSCO** today to see how they can help you with your Hand Furnace and Mini-Melt needs.

**EMSCO is ready when you need us...every day.**

## EMSCO's Commitment to you

**KNOWLEDGE:** EMSCO will begin each project with a customer-focused understanding of the problem to be solved and a soundly engineered approach to the solution.

**COST:** EMSCO will, when possible, offer more than one level of service and will explain the costs and compromises associated with each. Every option we propose will meet industry standards for safety.

**QUALITY:** EMSCO will understand and meet the quality expectations agreed to at the start of the project. Warranties will be explained and will set the standard for the industry.

**OUR GOAL:** EMSCO will provide quality services at reasonable prices so that our customers have the competitive edge in their markets.
